This compilation presents a series of market statistics for the years 1968 and 1969 pertaining to Federal Order No. 4, which regulates the handling of milk in the Delaware Valley Marketing Area.

Prices

The average of the monthly uniform prices paid to Delaware Valley order producers during 1969 was \$6.31 per hundredweight, a gain of 13 cents over the \$6.18 average price paid in 1968. From 1967 to 1968 there was an average gain of 16 cents per hundredweight in the uniform price paid to market producers. The annual average price for Class I milk increased 43 cents per hundredweight in 1969 (following a 38 cent advance in 1968), while the Class II price, which had increased by 22.1 cents in 1968, was 12.0 cents higher in 1969. The average Class I milk price for 1969 was \$7.24 per hundredweight and the Class II average rate was \$4.33.

During March through June 1969, producers were paid in accordance with the base-excess provisions of Order No. 4. During these four base paying months 722.3 million pounds or 90.5 percent of the milk delivered by producers was base milk (compared to 696.7 million pounds and 87.2 percent during 1968). The average base milk price during March through June 1969 was \$6.41 per hundredweight, 14 cents greater than 1968.

Milk Receipts and Utilization

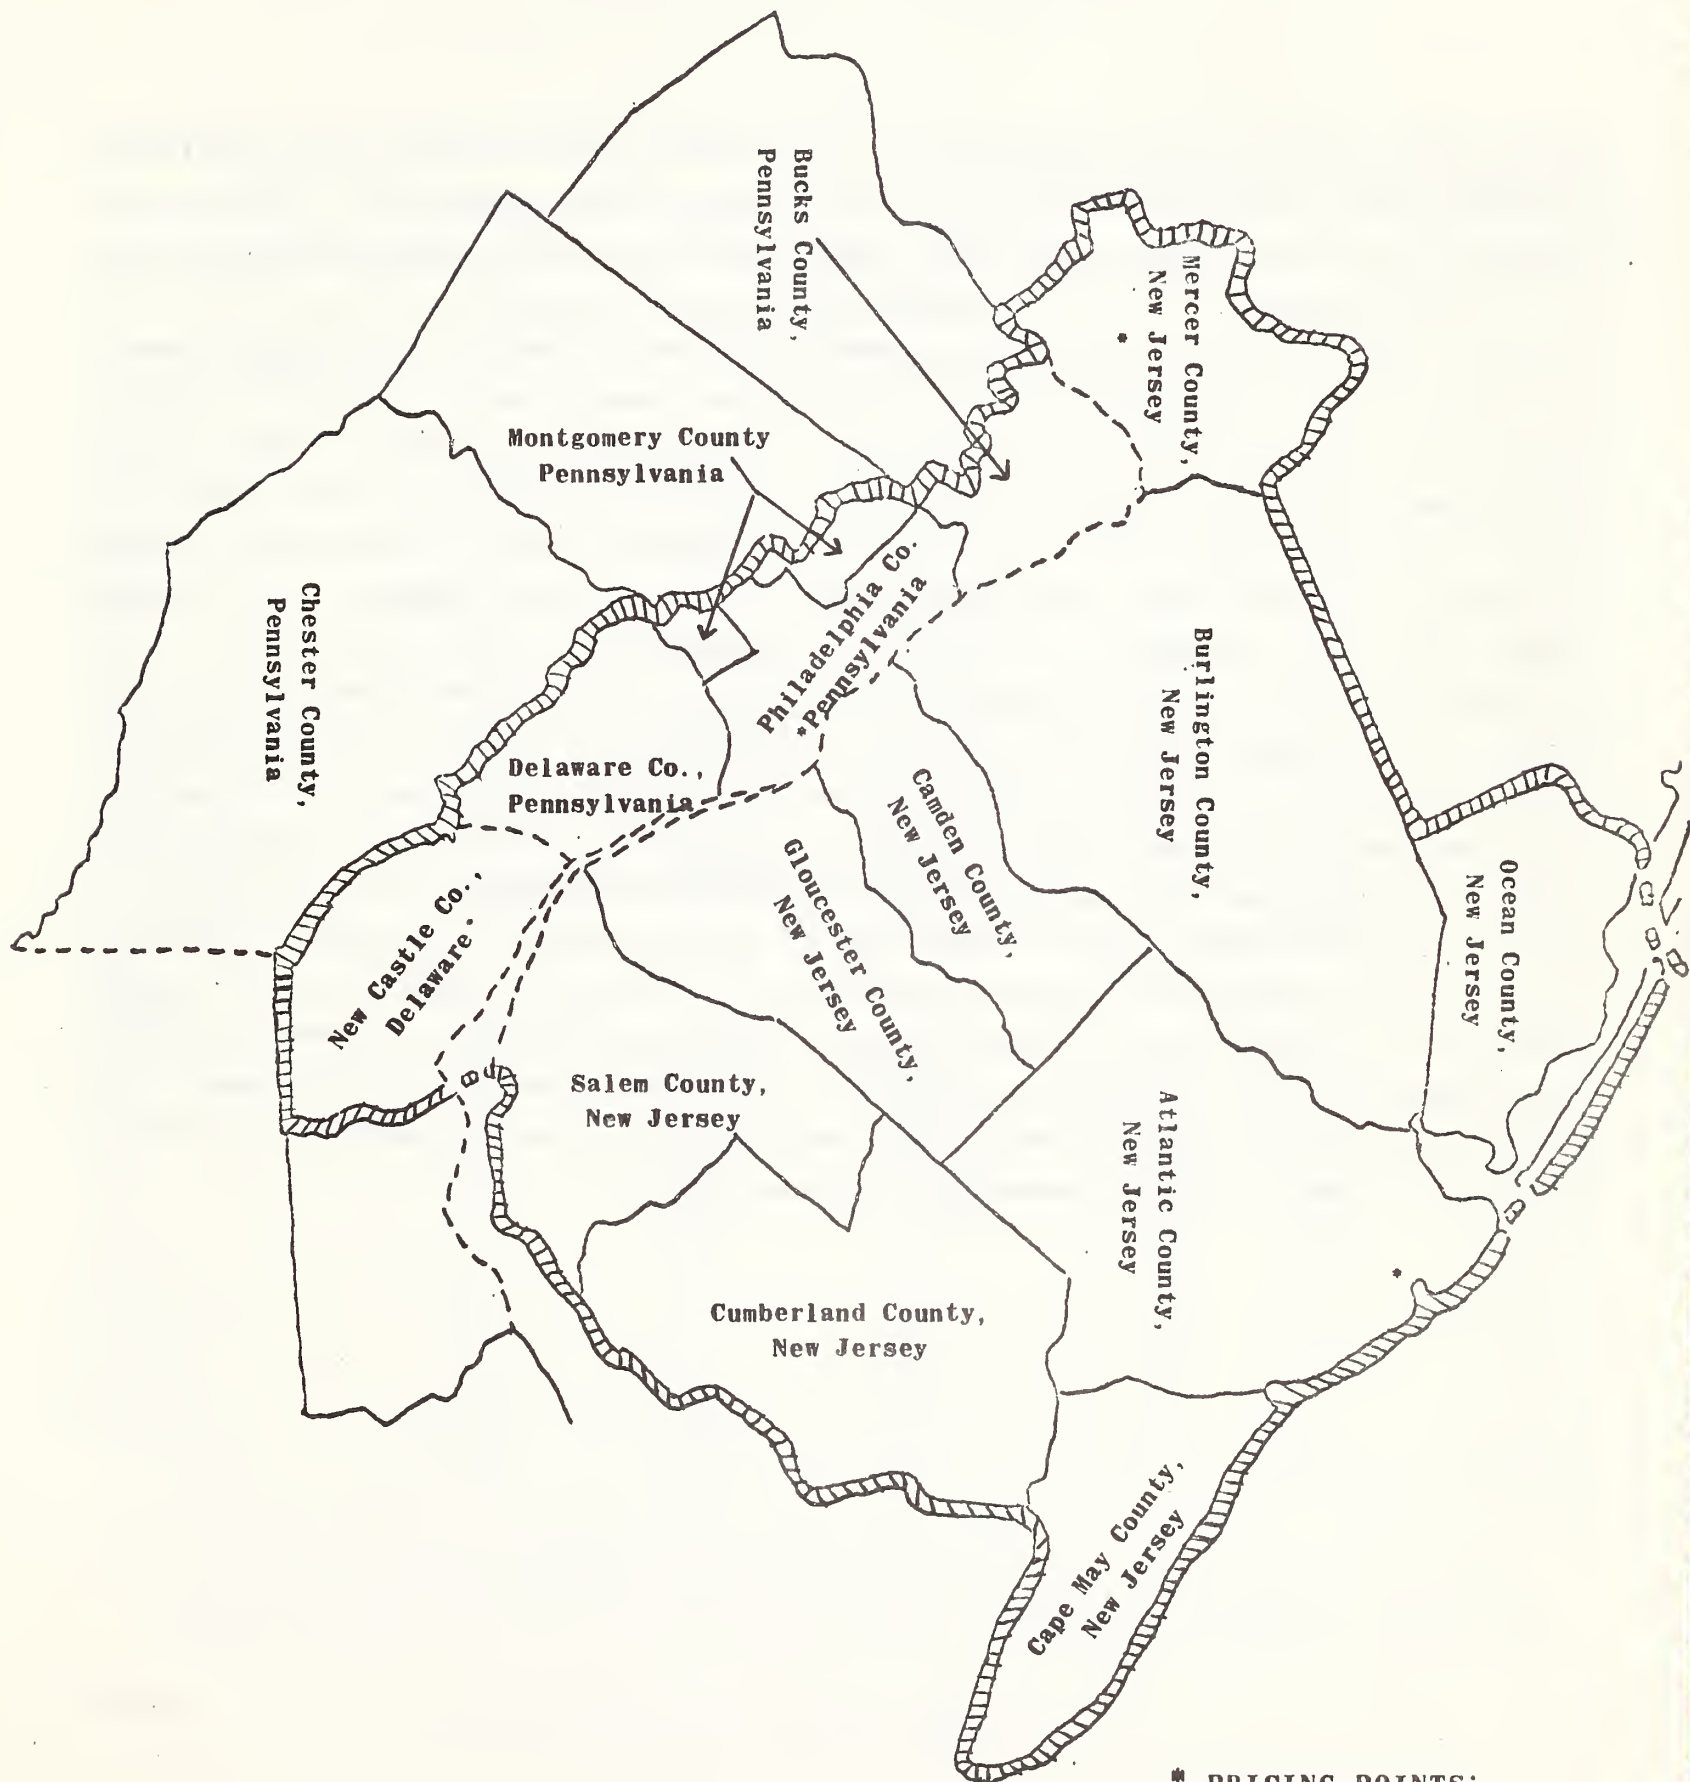

Producer milk deliveries increased by 4.8 percent in 1969 to 2,394.4 million pounds, (in comparison to an 18 percent increase in 1968). The average number of dairy farmers supplying the market in 1969 was 5,211, only 20 less than the average producer number during the previous year. The average Class I utilization percentage of producer milk dropped from 71.0 percent in 1968 to 67.5 percent in 1969, while the amount of producer milk priced as Class I decreased from 1,621.8 million pounds in 1968 to 1,614.9 million pounds in 1969.

Additional receipts of milk (including skim, cream and milk equivalent of concentrated products) reported by Order No. 4 handlers during 1969 included 1.2 million pounds from producer handlers and 77.5 million pounds from other order and non-regulated plants.

Class I Milk Disposition

Daily fluid milk disposition (on routes and by shipments) from plants fully regulated by Order No. 4 averaged 4.50 million pounds in 1969, a decrease of less than one percent from the 4.54 million pound average one year earlier. Route disposition within the Delaware Valley Marketing Area averaged 5.1 percent below 1968, while out-of-area Class I sales increased 12.7 percent in 1969.
